

Input

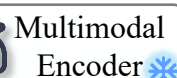

Language instruction

“Fly toward the **red car** near the building and descend for confirmation.”

Flight state

Multi-view observations

Shared features

(H_t)

Latent Assistant

Train only

External guidance / privileged signals

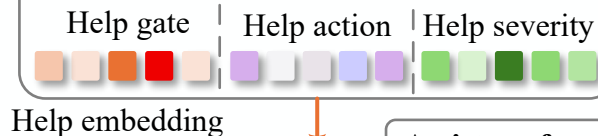

Privileged Teacher Model

Deployment (inference)

Student (latent assistant)

Assistant-free

Assistance-aware representation

Counterfactual Causal Grounding

Candidate Hypothesis Generator

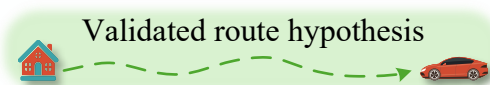

Step-aware consistency

Phrase-to-trajectory grounding

Keep c_t^+

Reject $c_t^1, c_t^2, c_t^3, c_t^4, c_t^5$

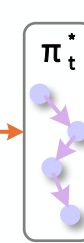

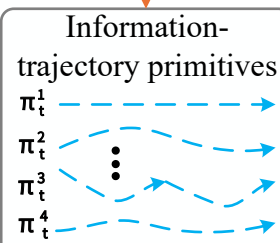

PAIT Affordance Field

Local 3D affordance field (voxel grid)

Affordance channels

Training (privileged)

Inference (autonomous)
